

Meeting minutes 02/22/2021 - 25 minutes

2021 Meeting 4

1. Safety Moment - Continued mask wearing diligence (Cortland)
2. New Technology - Supercritical carbon dioxide for power plants (Christof)
3. One Line Diagram
 - Looks good with everything so far
 - We should start working on the plan and elevation views for the real physical layout
 - Will need to look at clearance requirements and total substation footprint with fencing and control house added as well
 - Minimum clearances are very small compared to actual practice
 - We should look at doing some keynotes for these views as well
4. Trench Fill Tool
 - Still were waiting on some documents from B&V, will have them this week
 - Work on this and get a good version to present next week to show our progress
5. Action Items
 - Create a ready to present trench fill tool for next week
 - Begin work on plan view of substation bus layout
