

Meeting minutes 03/15/2021 – 25 minutes

2021 Meeting 6

1. No safety moment or new tech today, teams was down so meeting was held via webex instead
2. Plan View Diagram & One Line
 - Plan view looks pretty much good, just make sure of cable trench routing
 - Extend the fence a bit on all sides? Control house can be ~ 3ft from fence
 - Still confused about how to do relay equipment with one line; relay will come into play with DC battery calc
3. Trench Fill Tool
 - Still need more information on fiber optic and how to deal with cable insulation to come this week (Adam?)
4. Action Items
 - Finish grounding calculation for revised substation size
 - Next week the bus calc will be introduced to us; acts as a kind of sanity check to make sure everything is okay
